

**Predmet: Pravděpodobnost a statistika 1**

**Ukol: 4.**

**Verze: 1.**

**Autor: David Napravnik**

**Terč**

**distribucni funkce**

podle vzorečku pro obsah kruhu z polomeru  $O = \pi r^2$

$$Fx = x^2$$

**hustotni funkce**

$$fx = (x^2)' = 2x$$

**E(X)**

$$\mathbb{E}(X) = \int_0^1 2x^2 = \frac{2}{3}$$

**var(X)**

$$var(X) = \mathbb{E}(X^2) - (\mathbb{E}(X))^2$$

$$var(X) = \mathbb{E}(X^2) - \left(\frac{2}{3}\right)^2$$

$$var(X) = \mathbb{E}(X^2) - \frac{4}{9}$$

$$var(X) = \int_0^1 2x^3 - \frac{4}{9}$$

$$var(X) = \frac{1}{2} - \frac{4}{9}$$

$$var(X) = \frac{1}{18}$$

**σx**

$$\sigma x = \sqrt{\frac{1}{18}}$$
